
Career Path Activity

The purpose of this activity is to become familiar with the career paths. You will be working with a group to focus on one of the six paths.

1. Find the information for your assigned path in the student text. The page numbers are in the Table of Contents in the student book.
2. Read or scan the information for that path. You will use that information and the short description to create a collection of symbols to give the rest of the group a better sense of what your path is all about. Identify symbols that represent the work people do in the path.
3. Then you will:
 - a. Write the name of your assigned path at the top of the poster.
 - b. Use only symbols, not words.
 - c. Use markers to complete your collection of symbols.
4. Be ready to share with the group.
